

Deflector bar fitting

Radical side pannier racer bag

Your Radical side pannier racer bag pack should include one pair of 12.5L Radical side pannier racer bags, 2 deflector bars and 2 bolts with washers.

The deflector bars are provided to ensure that the bag doesn't rub against the tyre or chain while in motion. There is an increased risk of this happening if they are used on a ICE Vortex or without a rack.

The deflector bars are very easily fitted. Simply bolt the bars into place using the top hole and the washer. Ensure that the bar is pointing away from the body of the trike. Once attached, tighten the bolts using a 3mm hex key.
