

ICE Trikes Covid 19 Statement 25/03/2020

With the increased severity of the situation worldwide due to the Coronavirus we have updated our procedures here at ICE both in line with the new government guidelines and going beyond them to ensure the safety of our employees and our community.

These increased precautions are not causing ICE to close, we are still shipping trikes, helping our customers and making sure our family of ICE riders worldwide is supported now and moving forward.

We will likely see some short delays to shipping due to reduced workforce density to ensure our team can maintain social distancing and ensure all shared tools are disinfected but please rest assured your trike and accessory orders are being processed as quickly as they safely can and we will be keeping the shipping times as short as we can.

Our customer support teams are still working hard from their homes to keep you updated with any information or support you need. Please contact us by email with any questions.

Thank you for your patience. Stay Safe.

The ICE team.
